

The FAA Safety Team presents:

## **Do You Have Collision Protection?**

Attend this exclusive briefing on advanced skills for avoiding aircraft collisions! Whether you're in the enroute phase of flight, in the traffic pattern or flying into a large general aviation event, having good visual separation skills is fundamental to your safety. At this briefing we will assess separation and discuss how to estimate closure rates. Our expert will describe the safety issues, planning and general safety techniques similar to those presented to groups planning on mass arrivals at fly-in events. He will identify special areas of risk when flying VFR arrivals to unusual airports and how these skills apply to daily flying. Our featured speaker has extensive experience as a Naval Aviator, including Commanding Officer of the USS America, as well as many civilian programs including president of the Bonanza / Baron Pilot Training Inc. flight training program. Click on the link below to register TODAY!

**Directions:** Conference room in Landmark Aviation FBO building.

**A message from the National FAASTeam Manager**

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!
